Ex. 6-Personal Privacy

I'm responding to your inquiry about particulate air monitoring for hydraulic fracturing sand around SH Bell.

There are several monitoring sites operated by Ohio EPA around SH Bell. The closest site is at the Water Plant located at 2220 Michigan. The site monitors for PM10 - particles less than 10 micrometers in diameter. While the sand that is used for hydraulic fracturing is of a smaller particle fraction, if present it will impact the PM10 monitor.

You can view data for this monitor and surrounding monitors at <http://www.epa.gov/airdata/>. You can also view OEPA's monitoring plan at <http://epa.ohio.gov/dapc/ams/amsmain/tabid/2772/LiveTabId/126985/Default.aspx>. If you have additional questions, please feel free to contact me.

Thanks,

Marta Fuoco
